PROJECTS

- **M.Sc. thesis:** Investigations on the some phenological, biological and pomological characteristics of four sweet cherry (*Prunus avium* L.) cultivars widespread in korkuteli district.
- The selection of fig(*Ficus carica* L.) in the West Meditterian Region. (2001-2003) (**TUBITAK project**)
- The uses of plant growth regulator in fig (*Ficus carica* L.). (2001-2003) (**TUBITAK project**)
- Establishing carob orchards with wild and commercial types and varieties with economically important and the cmparision of these types in terms of biological, phenogial and pomological features and plant nutrient component contents. (**Cost Project**)
- Determiation of yield, Aroma Compounds and Some Quality Parameters and Polyphenol oxidase activity of Dwarf Cavendish Banana cultivars grown under openfield and protected cultivation at different locations in Turkey (**TUBITAK Project**)
- Physiological Review Of The Fruit Cracking Of The Bananas Grown Outdoors And Under Protective Cover (Greenhouse) (**TAGEM Project**)
- Drip Irrigation System with applied nitrogen Washington Navel Orange Yield and Quality Features Effects in Different Levels.) (**TAGEM Project**)
- Some Agricultural Waste Use in Banana Cultivation (**TAGEM Project**)
- Determiation of Maturity Period of Some Avocado Varieties Using Physiological and Chemical Parameters (**TAGEM Project**)
- Determiation on the Boron Nutrition Status of Greenhouse Tomato and The Effect of Boron Application on Yield and Quality (**Boren**)
- Determiation on the Boron Nutrition Status of Greenhouse Tomato and The Effect of Boron Application on Yield and Quality (**TAGEM**)
