Bursa Central Research
Institute of Food and Feed
Control

Safe Food...Healthy Life...

Accredited by International Standards

► CENTRAL RESEARCH INSTITUTE OF FOOD AND FEED CONTROL

On 25 February 1961, our Institute was founded to establish and develop canned food industry in Bursa where is a city of Marmara region and majority of vegetable and food demand of Turkey is supplied. Institute was named as "Research Institute of Canned Food".

After some organizational changes, eventually our Institute has been named as "Central Research Institute of Food and Feed Control" since 2011.

The Institute affiliated to MFAL (Ministry of Food, Agriculture and Livestock) provides lab services with its qualified staff works in team spirit and has principle based on to fulfil customers' requests on time with a trustable and objective manner. The aim of our Institute is to extend our skills and be leader by following technology.

Our customers consist of firms in private sector, provincial directories of MFAL established in Bursa and nearby cities where activities of food industry and agricultural production is very common and directories of other public organizations.

In accordance with mission given by MFAL; Our Institute implements research and analysis services of food, feed, water and fishery products.

Our Institute aims to provide the most qualified, quick and trustable services to our customers and improves strategies focused on customers. Our staff implement research projects on food sector by working especially together with TAGEM, TUBITAK, universities and private sector.

Analysis classified as

⇒import,

⇒export,

⇒control,

⇒private request and

are implemented by using appropriate technology in our accredited Institute. Also, R&D (Research and Development) researchment services are implemented on food and feed. Thus, our Institute provides a huge contribution for society to consume more qualified, safe and healthy food.

The Institute began to studies in 2001 to establish a quality management system. ISO 9001:2000 certificate was given to our Institute by TÜV in 2002 and procedures done by our staff have provided a basis for accreditation.

Our Institute has been accredited according to TS EN ISO/IEC 17025 standard by Turkish Accreditation Agency since 2004; and the number of accredited analysis has been increasing year after year.

Accreditation of our Institute provides advantages which are reason for being preferred by customers, easiness for national and international trade of goods and prestige in sector.
